

## **Open Call kültür gemma! 2019 Four Scholarships**

March 25, 2019

For the seventh time kültür gemma! will award four working grants to migrant artists and cultural producers from all fields and genres.

### **What will be awarded?**

kültür gemma! will award four working grants for six months, each with 1,300 Euro per month. During this period of time, the submitted proposal is to be realized, while entry into the cultural field and networking within this field is to be supported at the same time.

### **Who can apply?**

With the current call for proposals, candidates from all sections of art and culture are invited to apply. The call is directed to cultural producers living and working in Vienna, who define themselves as migrant, Black, Person of Color without any specifications regarding countries of origin, nationalities or the like. kültür gemma! understands migrant as a political concept and as the self-designation of a specific position within a majority.

### **With which kind of proposals?**

Project proposals can be submitted, which deal with current socio-political issues. There are no specific thematic restrictions at all, so the project don't have necessarily to deal with migration or any specific topic alike.

Proposals can be submitted from all areas of art and culture. This means, for example, that a poetry volume is just as welcome as a temporary intervention in the street, a musical as welcome as a virtual action with social media, a Super-8 film, or a fashion show.

It is important that the project can be realized in the given time frame and will be presented to the public in 2019. Apart from a contribution of 800 Euro for the final presentation, no further money for the production and realization of the project will be provided.

### **What is to submit? And when?**

Interested persons are invited to submit a two-page concept by April 26, in which the – not yet realized – work proposal is concretely described. Alternatively you could describe your concept audio-visually, via Video or Audio (max. 5 Minutes). A maximum of three images,

sketches, etc. may be included.

The application concept is characterized by its feasibility within six months, and has include the forms and locations of its presentation.

In addition, a biography (one page maximum) should be included, which enables an idea of previous work in the cultural field (not a classic CV, in other words, but rather a description in a self-chosen format). Concept and biography should be submitted in English or German, if possible; attempts will be made to enable a translation from other languages, if necessary. *As soon as the jury announces the 4 grantees, we will delete the concepts and biographies due to the data protection regulation.*

### **Who will select the candidates?**

A jury of experts already established in various areas of the cultural field will select the four grantees. Following an internal pre-selection, the jury will meet the finalists personally and make their decision after these interviews.

### **What do the grantees do?**

The grantees will realize their planned work proposals within six months, continuously accompanied and supported by kultür! gemma!. The works will be presented in the end during a public event, the group will plan and realize together.

**If you have questions please contact us anytime via e-mail:**
